About Medicen Paris Region

Medicen Paris Region is a competitiveness cluster for innovative health technologies, with national and international scope. With nearly 300 companies, research centers, universities, hospitals and local authorities as members, it aims to position the Paris region as Europe's leading health cluster. It focuses on five strategic areas: biological diagnostics, diagnostic and interventional imaging, regenerative medicine and biomaterials, digital health and translational medicine. In close collaboration with local, regional and national healthcare innovation players, Medicen Paris Region aims to:

- Foster the emergence, development and funding of certified collaborative projects in the healthcare sector, in order to create economic value and jobs
- Increase the international development of innovative startups and SMEs
- Strengthen the attractiveness of the Paris region, which represents more than 50% of life sciences activity in France

Since the creation of the cluster in 2005, 57 innovative products have been launched in the imaging, medical devices and biological tools sectors. The cluster has certified 289 projects. They received funding from the French government (French Inter-Ministry Fund FUI, Structuring Projects fund), the public investment bank Bpifrance, the National Research Agency, the European Regional Development Fund, the Investments for the Future program and/or local authorities, and the Paris region. Total investment is close to €1.2 billion and €533 million of public aid. www.medicen.org
